COMMISSION

Stephen M. Hadley, Chairman
Thomas R. Carlson, Commissioner
Dixie L. Minson, Commissioner

DEPARTMENT

Floyd G. Astin, Administrator
Karen G. Asay, Administrative Assistant
Terry O. Burns, Unemployment Insurance Director
Rosemarie S. Carter, Administrative Services Director
Louis M. Pickett, Field Operations Director
Larry K. Wardle, Labor Market Information and Research Director

ACKNOWLEDGMENT

Like most major publications, this year's statistical abstract represents the efforts of a number of people. Kris Beckstead, Lanore Cunningham, Kenneth Jensen, and Richard Newman put together the statistical data and narrative comprising the Labor Market Information portion of the abstract. Gilda Robertson and Ronald Skocki prepared the statistics and narrative describing Employment Service workload accomplishments for 1988. Stewart Campbell and Julie Wilding compiled data and wrote the narrative highlighting Unemployment Insurance workload activities for the past year. And finally, but not least, many thanks are extended to the Supportive Service staff: Joyce Larson, Debra Bonacci, Maria Campbell, D'Launa Rindlisbacher, Shelley Roberts and Barbara Watt. Without their able and cheerful assistance, this abstract would have never come into publication.

Gary Felker, Supervising Economist

Part 1: Labor Market Information

LABOR MARKET INFORMATION

SECTION I

SUMMARY OF 1988 EVENTS

A REVIEW OF UTAH'S 1988 LABOR MARKET

Utah's economy was much stronger in 1988 than in either of the previous two years. The annual average unemployment rate fell to 4.9 percent -- down from last year's level of 6.3 percent. This drop, while very significant, does not tell the whole story, for monthly unemployment rates continually declined through the year and finished well under the annual average, at 3.9 percent. In tandem with a falling unemployment rate, growth in total nonagricultural jobs was robust. In fact, on an average annual basis, twenty thousand new nonagricultural jobs were created in 1988. Such a substantial growth in jobs has not occurred since 1985. Furthermore, this 3.1 percent job growth does not completely reflect the strength of the 1988 economic rebound in the state. By the end of the year, the growth rate in nonagricultural jobs had surged to 4.0 percent -- creating more than twenty-six thousand new jobs.

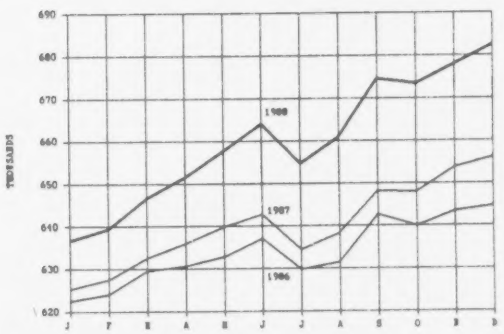
MINING: STRONG START -- WEAK FINISH

On an annual basis, growth in mining employment in 1988 was virtually nonexistent. The year-over employment level increased impressively early in the year, for January's employment was ahead by 700 jobs from the previous year's. However, during the year, this strength began to fade -- so much that by the end of the year mining suffered a loss of 600 jobs. The oil and gas sector contributed to most of this decline, which had decreased by 300 jobs by December. The metals segment accounted for 200 of these lost jobs, and coal 100.

CONSTRUCTION: A TURNAROUND

Although mining lost ground during the course of 1988, construction reversed its downward spiral, moving into a positive growth trend. Up to the month of September, construction employment continued, as in the past several years, to fall. However, in October, construction employment actually recorded a year-over gain of 100 jobs. Although this gain is small, it may

UTAH'S NONFARM EMPLOYMENT
1986 - 1988 BY MONTH



Source: Utah Department of Employment Security

represent a long-awaited turnaround in this industry or, at least, a bottoming-out. After October's gain, November followed with an increase of 400 jobs, and December continued these successful trends with another jump, consisting of 200 jobs. Because jobs were lost early in the year, the 1988 average annual construction employment (24,981 jobs) again finished lower than the previous year's -- the lowest since 1975.

MANUFACTURING: SUPERSTAR

A 7.0 percent average annual growth rate in manufacturing made it Utah's superstar industry for 1988. In fact, in September, manufacturing experienced a 8.0 percent rate in job growth. On an average annual basis, 6,500 new jobs were created -- 3,400 in durable goods and 3,100 in nondurable goods. Because Geneva Steel Works reopened late in 1987, annual 1988 employment growth in primary metals contributed substantially to this noted increase in jobs in durable goods manufacturing. Primary metals, however, was not the only segment that experienced substantial gains, for other sectors closely followed. In the nondurable goods sector, the growth in jobs was also broadly distributed. Foods and chemicals segments were particularity strong, gaining 1,200 and 500 jobs respectively.

TRANSPORTATION, COMMUNICATION, AND PUBLIC UTILITIES

At the beginning of 1988, the transportation, communication, and public utilities (TCPU) industry had grown -- but only by 800 jobs. As the year progressed, job growth in this industry picked up. By the end of the year, TCPU had created 1,600 new jobs -- more than the cumulative gain during the previous three years. In August, TCPU's year-over gain in jobs had reached 2,200 positions. On an annual basis, the job level stood at 1,500 positions higher than in the prior year. While both railroads and communications and public utilities lost 300 jobs, trucking and air transportation surged. In particular, trucking was "on a roll," gaining a yearly average of 1,600 jobs. In this year, events in trucking once again followed the course of history -- paralleling the job trend for total nonagricultural jobs. Furthermore, continued strength in the trucking sector is anticipated.

TRADE: LOOKING GOOD

The modest annual growth rate of 2.6 percent in the trade industry understates the strength of its growth. In the beginning of the year, only 200 new jobs had been created. By December, however, this industry had an amazing gain of 8,100 jobs. What is even more exciting is that every major segment within the trade industry contributed to that increase. Leading year-over gains for December were durable goods in wholesale trade (creating 2,100 jobs) and eating and drinking establishments in retail trade (increasing by 2,200 jobs). Other noteworthy year-end increases occurred in department stores (creating 1,200 more jobs) and automotive dealers (increasing 2,200 jobs) segments.

FINANCE, INSURANCE, AND REAL ESTATE: "HO HUM"

During 1988, the finance, insurance, and real estate industry (FIRE) was apparently unaware that an economic rebound had been underway in Utah. FIRE's laggard employment level decreased by 400 jobs during the year. Comparison of monthly changes in employment identifies January as the only month that increased. February remained constant, and all other months recorded modest jobs losses. However, the good news is that no large job losses occurred.

SERVICES: CONTINUES ITS WINNING WAYS

Up by 8,300 jobs in 1988, an increase of 5.7 percent, services continued to "steam roll" along. This industry has contributed significantly to Utah's job market during the past several years. Since 1983, services has created over 43,000 additional jobs in Utah. These added jobs disproportionately represent 46 percent of the state's total nonagricultural jobs growth during the last 5 years. At the same time, annual wages paid to workers in the service industry increased by over $1 billion. Service industry wages were $2.5 billion in 1988 as apposed to $1.5 billion in 1983. This significant increase represents 33 percent of the increase in annual wages paid to all nonagricultural workers. This long-term and broadly-based growth trend in services has not shown any signs of letting up, for preliminary figures for 1989 suggest that the service industry will continue to grow.

GOVERNMENT

Although its growth in jobs was virtually constant in 1988, even the government sector showed signs of life. One thousand and two hundred jobs were created during the year, just under a 1.0 percent growth rate. While not much to brag about, this growth was positive and occurred in spite of a reduction of 900 federal defense jobs. Local education was the primary source of jobs gains in government, creating over 1,000 jobs. Consequently, growth in this segment alone offset the loss in federal defense jobs.

UTAH AS COMPARED TO THE USA

Utah's total nonagricultural jobs growth rate of 3.1 percent was closely aligned to the national nonagricultural growth rate of 3.3 percent. However, comparisons of major industries in Utah with those in the rest of the United States reveal that significant differences in some industries. Table 1 compares Utah's change in nonagricultural for major industries during 1988 with that of the United States.

Growth Rates of
Nonagricultural Payroll Jobs
by Industry - Utah and United States

Rate	5.3	5.2	5.1	5.1	5.0	4.9	5.2	5.4	4.9	4.3	4.1	3.9

Note: Detail may not add to totals because of independent rounding.
A conceptual difference exists between "Civilian Labor Force and Components" and "Employees on Nonagricultural Payrolls." The former is an estimate of the number of employed and unemployed persons by place of residence (employed persons include those with a job but not at work), whereas the latter is a payroll count of the number of jobs at the place of employment as reported by the employing establishment.

Note: A conceptual difference exists between "Civilian Labor Force and Components" and "Employees on Nonagricultural Payrolls." The former is an estimate of the number of employed and unemployed persons by place of residence (employed persons include those with a job but not at work), whereas the latter is a payroll count of the number of jobs at the place of employment as reported by the employing establishment.

1/ Salt Lake City includes Downtown, East Side, Avenues, University, East Bench, Sugar House, South State and various other areas, and therefore, will not add to County total.
Community boundaries were modified in 1988. Historical data for existing communities were revised to reflect these boundary changes. For newly established communities (Taylorsville, Airport, and South Salt Lake), only 1987 and 1988 data are available.

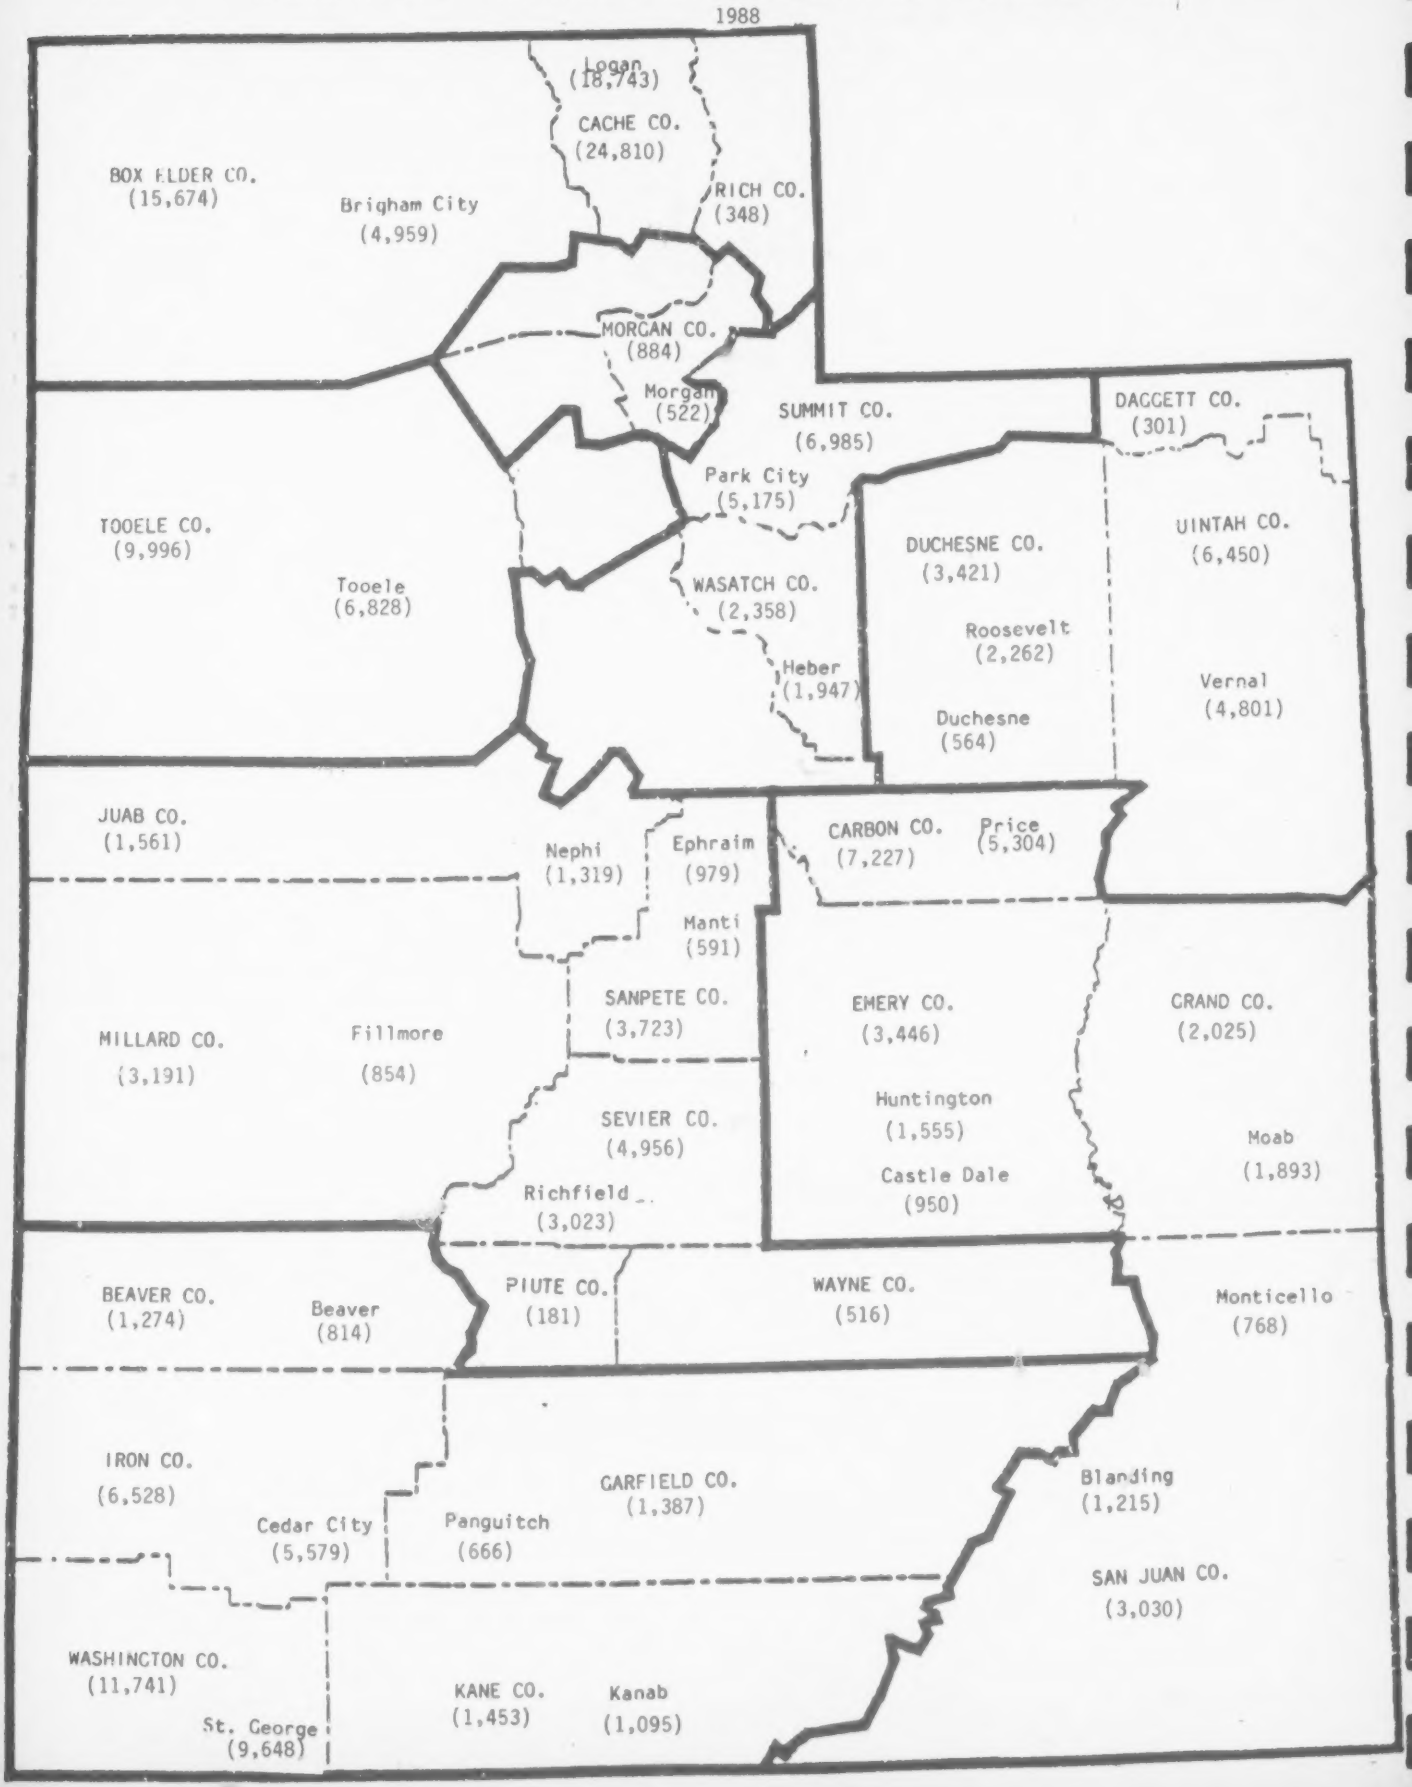
NONAGRICULTURAL EMPLOYMENT FOR NON-WASATCH FRONT COUNTIES IN UTAH

1988



ES

Part 2: Employment Services Activities

EMPLOYMENT SERVICE ACTIVITIES

SECTION I

SUMMARY OF 1988 WORKLOAD

EMPLOYMENT SERVICE ACTIVITIES FOR PROGRAM YEAR 1988

During Program Year (PY) 1988 (July 1988 through June 1989), 176,055 individuals registered with Job Service. This represents a 3.6 percent increase over the previous year's registration. Likewise, the number of individuals referred to jobs increased by 14.8 percent. For individuals placed on jobs, the percentage increase was 8.2 percent (See Table 1.)

The number of individuals placed during PY 1988 represented 22.9 percent of those persons filling a new work application or renewing an old application with the Department. These placed individuals represent 43.4 percent of individuals referred to jobs. The ratio of the individuals referred relative to new applicants and renewals has increased over PY 1987 by 7.9 percent. (See Table 2.)

Employers who seek workers may call the Department and place job orders. Each of such orders placed is occupation specific. Each order, itself, may be for more than one job opening. At the conclusion of PY 1988, some 56,994 job orders were received by the department. This represents an increase of 12.5 percent over the preceding program year. (See Table 1) On an average, each job order represented 2.5 job openings. Furthermore, 34.0 percent of these job orders were placed by unique employers. Thus, it is estimated that more than one in three of Utah's tax reporting employers place at least one job order with the Department.

1/ PY 1988 began July 1988 and ended June 1989.
Source: Utah Department of Employment Security.
Labor Market Information (LMI) Services.

The pattern of job openings by sector mirrors that of PY 1987. The leading industrial sector was Services (42.7%) followed by Wholesale/Retail Trade (20.4%) and Manufacturing (12.4%).

Self-help programs continue to occupy a significant position in the Department's efforts to provide applicants with needed employability services. More than 10,000 individuals entered either Job Search Workshops or Job Finding Clubs. Approximately 73.0% of the participants in these programs obtained employment. The success of Job Search Workshops has risen by 8.6% and that of Job Finding Clubs by 17.2%. (See Table 3)

Federal law required Job service agencies across the country to track and serve individuals who earn more than half of their income performing seasonal farming work. Of particular concern are migrant workers who travel from home on an overnight basis. Many of these workers form the migrant worker stream which flows from state to state during the farm planting, growing, and harvesting seasons.

The number of active Migrant and Seasonal Farmworkers (MSFW's) had declined in PY 1988. Yet, services in the form of counseling and job development contacts both increased substantially. (See Table 4) Of even more importance, the percent of active applicants placed has risen considerably from that of PY 1987. In PY Year 1988 the Department was able to place 55.0% to MSFW applicants compared to 43.0% in the preceding program year.

Labor Market Information (LMI) Services. (G2)

The downward trend in the average hourly placement wage in Utah has been reversed in PY 1988. The average wage has risen from $4.00 in PY 1987 to $4.56 in PY 1988 representing a 14.0% increase with females and veterans experiencing the largest gains within the major applicant groups. (See Table 5)

Tables 8 and 9 display Department revenues and expenditures during the last year. It should be noted that disbursement data may represent funds received in one year and expended during a subsequent year. This explains why disbursements exceeded revenues for the General Grants and other Revenues categories. (G2)

1/ FY denotes Fiscal Year and covers the period from October to September.
PY denote Program Year and covers the period from July through June.

2/ In 1983, the reporting period was converted from fiscal year to program year. As a result, PY 1983 represents a nine month transition year beginning October 1983 and ending June 1984.

3/ Information is not available prior to PY 1983.

UNEMPLOYMENT COMPENSATION PROGRAM

SECTION I

SUMMARY OF 1988 ACTIVITIES

INSURED EMPLOYMENT

Insured employment in the State of Utah rose by 3.5% in 1988 when compared to the level of employment in the previous year. Experience rated firms, or private firms that are subject to the Employment Security Act and are assessed a tax rate, experienced a 4.1% growth rate in employment in 1988. The most significant growth in employment in percentage terms took place in the Service sector at 7.7%. Manufacturing and Agriculture both showed healthy growth in 1988 with 7.1% and 6.8% respectively. The remaining industries experienced moderate growth in employment with the exceptions of Finance, Insurance and Real Estate; and Construction. Construction continued to lose insured employment at a high rate , however the rate of decline has decreased from 17.2% in 1987 to 6.4% in 1988. Reimbursable organizations, which are Nonprofit Organizations and Government units that reimburse the Utah Unemployment Insurance Reserve Fund for the actual cost of benefits paid to their former employees, showed an increase in employment of a mere 1.2%. Nonprofit Organizations showed a small decline of 2.1% while Local and State Government agencies had small increases in employment.

TOTAL AND TAXABLE WAGES

Insured Wages paid in the state during 1988 were $10,964.9 million which represents an increase in total wages paid of $745.2 million over 1987. The average weekly wage increased by 3.62% from $343.49 in 1987 to $355.91 in 1988. No experience rated industry experienced any unusually high or low rate of average wage growth in 1988. Agriculture had the lowest rate of growth at 2.0% while the Construction and Mining industries both experienced growth rates of over 4%. Among the Reimbursable Organizations there was more disparity in wage growth. On average the Reimbursable Organizations saw a 3.69% growth rate in wages for 1988. Local Government was on the low end at 0.68% and State Government had a high growth rate of 7.28%. The 4.96% growth rate in average wages in Nonprofit Organizations was more moderate and more closely followed the trend among the experience rated firms.

CLAIMS ACTIVITY

In 1988, most claims workload activities again showed significant decreases over the previous year. Initial Claims, which includes initial and additional requests for benefits, dropped by 11,258 compared to the 1987 figure. This represents a decrease of 15.22 percent. Total Weeks Claimed dropped by 23.67 percent as the Insured Unemployment Rate fell from 2.17 to 1.60 percent. The amount of benefits paid decreased by over $23 million dollars or 25.79 percent as compared to 1988. Although the Maximum Weekly Benefit amount increased from $201 to $202 the Average Weekly Benefit decreased slightly. The number of First Payments dropped by more than 16 percent, however the number of first payments relative to the number of eligible claimants changed very little. Reversing last year's trend, the percentage of those who received a first payment and went on to exaust their benefits droped from 39.7 percent to 31.4.

RESERVE FUND REVIEW

The Employment Security Act specifies that a minimum adequate reserve fund level be maintained in order to prevent insolvency and excessive fluctuations in employer contribution (tax) rates. This minimum level is determined by computing the average of the five highest benefit cost rates experienced in the last 25 years, multiplying by 1.5, and then multiplying by total wages. This is a dynamic measure and changes as wages increase and as the benefit cost rate changes (the benefit cost rate is computed by dividing unemployment compensation benefit costs by total wages of individuals covered under the Unemployment Compensation Program). It is a static measure in terms of the fact that it measures the reserve fund balance at a specific point in time and disregards the economy in relation to the business cycle. Therefore, the actual reserve fund may be above or below the minimum adequate level at a particular point in time. It does, however, provide a guide in terms of maintaining solvency and trends will suggest the necessity of any needed changes over the long run.

Table 6 shows the actual reserve fund balance in relation to the "minimum adequate reserve level" for 1960 - 1989. Although not shown in Table 6, during the mid-forties the reserve fund was excessively high. Starting with the late forties, a gradual decline occurred in relation to what a minimum adequate level should be, even though the reserve fund actually increased. Between 1960 - 1971, the reserve fund as a percent of the minimum adequate reserve level fluctuated from 139 to 179 percent. By 1975, the reserve fund had dropped below the minimum adequate level, primarily because of the 1975 recession. Before recovery could occur, the back-to-back recessions of the early eighties forced insolvency. Almost $29.0 million was borrowed from the federal government in 1983 in order that unemployment compensation benefits could be paid. Although the reserve fund has improved in terms of solvency, it has hovered at about 83 percent of a minimum adequate level in the past few years. If the economy does not soften nor experience a recession in the next year, the reserve fund will reach and surpass the minimum adequate level.

As was true in 1987, disbursements from the UI reserve fund declined in 1988. This occurred as a result of another significant decrease in initial claims and weeks claimed. The disbursement total for 1988 was down $29.4 million from CY 1987, representing a 28.7% decrease over the previous year.

Not only did disbursements from the fund decline, but reserve fund revenues decreased as well. This decrease was much smaller, however, in both absolute and percentage terms then the decrease in disbursements. This year's Fund Revenue totaled $7.0 less than that of CY 1987. This comes to a 6.4% decrease. The fund subcategories of contributions, federal funds, reimbursement on benefit payments, and interest and penalty all showed declines from 1987 levels. The one exception to the declining trend from the previous year was trust fund earnings which increased by $0.90 million.

The reserve fund balance increased by 13.9% to $180.7 million. This balance is 91.2% of the legislated adequate reserve level.
